From simulation to track testing

AB
Dynamics

“Translating experimental test setups between different software platforms causes unnecessary costs and errors”

Automotive test equipment

Robotic test systems
(>1000 in use globally)

ADAS platforms
(>100 in worldwide use)

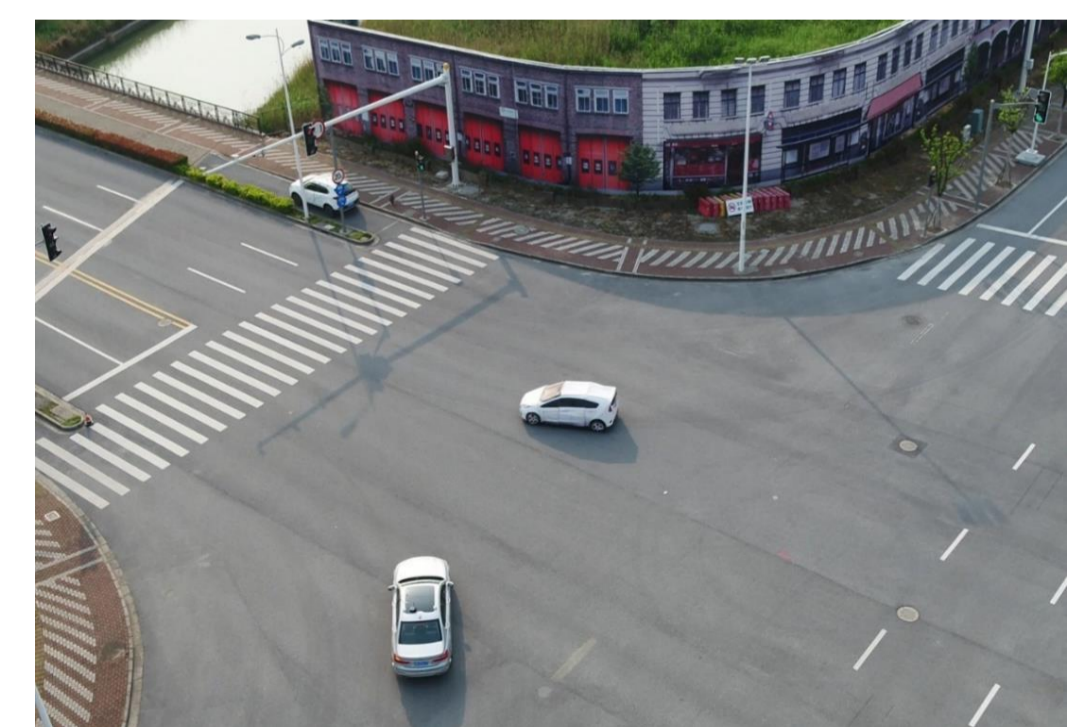

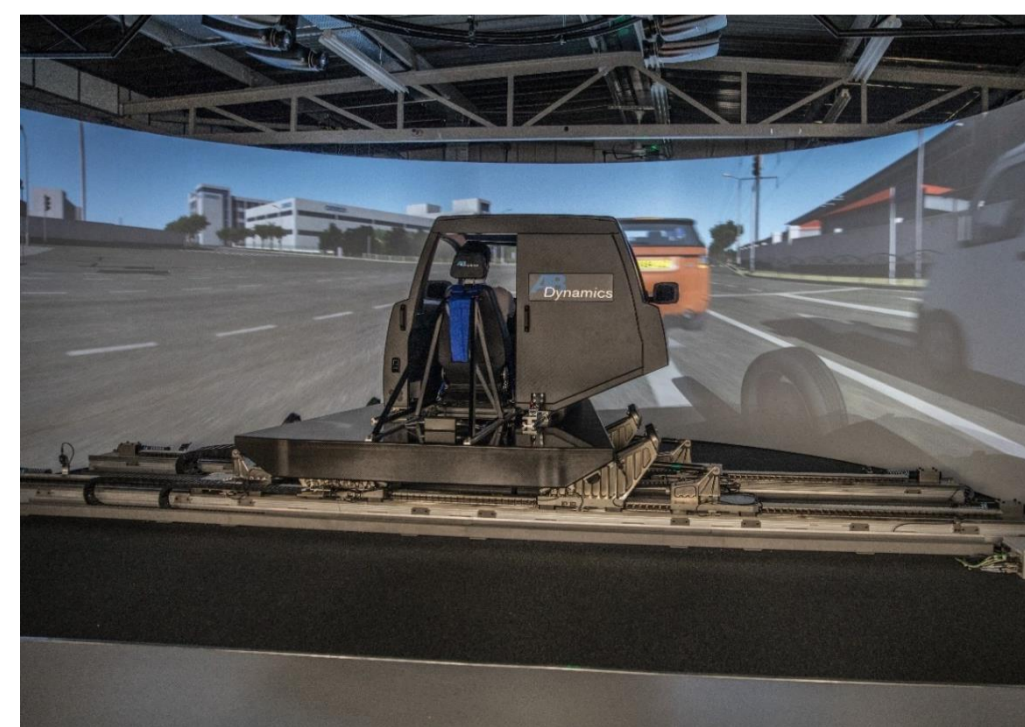

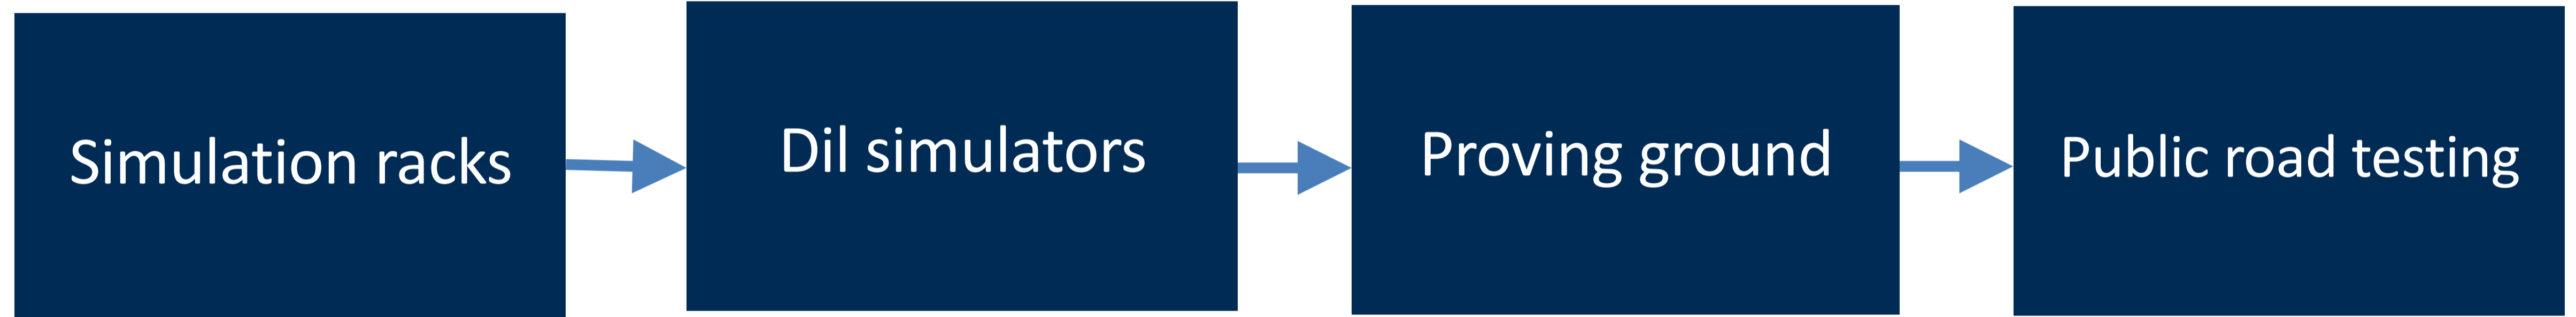

Suspension measurement

One toolchain for both simulation & track testing

Proven AB Dynamics and rFpro software toolchain and test equipment provides consistency in both virtual and real world testing

DiL simulators running AB Dynamics & rFpro software

Reliable

Robust

Leading motion platform performance

Cost effective

Low maintenance

Our aVDS DiL simulator in operation

The logo for AB Dynamics, featuring the letters 'AB' in a bold, blue, sans-serif font, with the word 'Dynamics' in a white, italicized, sans-serif font positioned below and to the right of 'AB'.
