DSC 2019 EUROPE VR

DRIVING SIMULATION & VIRTUAL REALITY CONFERENCE & EXHIBITION

The DSC Europe 2019 VR conference organization team is pleased to introduce the **NEW Industrial session** planned for our 18th edition!

The DSC Conference gathers driving simulation specialists from the industrial and academic communities as well as commercial simulation providers. This 18th edition follows that of 2018, held in Antibes, with close to 350 participants and 35 exhibitors. Participants came from all around the world from about 24 different countries of Europe, America, Asia and Africa.

This year's edition will be held in Strasbourg, France with an extended professional exhibition. Topics will include state of the art in driving simulation technology, research and developments,

extended with progressively merging virtual reality (VR) developments. This year program will also give an enlarged place for simulation tools for autonomous and connected vehicles along with advanced driving assistance system (ADAS) applications. Human factors and motion rendering nevertheless will remain the now traditional axis of the conference.

You are welcome to the DSC 2019 Europe Conference organized by the Driving Simulation Association, Arts et Métiers ParisTech, IFSTTAR and Renault, held in Strasbourg (France), on September 4th-6th midway between Paris and Stuttgart!
